Release Note LS-200 v2.9.6.12

New Features

| Item                                   | NEW Features                                                                                                                                                           |
|----------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>WEB</b>                             |                                                                                                                                                                        |
| <b>Admin/ Video/ Recording</b>         | Change: prefix string now will apply to the title in metadata and the container folder of each recording while uploading.                                              |
| <b>Admin/ Storage</b>                  | Add connection test for NAS settings                                                                                                                                   |
| <b>Admin/ Scheduler</b>                | Opencast refresh interval changed from 1 hour to 5 minutes.<br>(*Refresh interval on iCal remains the same as 1 hour)                                                  |
| <b>Admin/ Scheduler</b>                | Change on the retry mechanism.<br>After booting up, Media Station would start recording if there is any schedule of which start time has passed but not ended yet.     |
| <b>Admin/ Interactive</b>              | Interactive mode ( <i>*license required</i> )<br>Allows multiple Media Stations to setup distance meeting by streaming.                                                |
| <b>Admin/ System/ System Settings</b>  | Scheduled power on and off by day.                                                                                                                                     |
| <b>Director</b>                        | Subtitle editor<br>Allows users to overlay text on the mixed video on the web director page.                                                                           |
| <b>Director</b>                        | Theme editor<br>Allows users to edit existing themes on the web director page.                                                                                         |
| <b>Video Manager</b>                   | Add re-upload button for existing videos that have failed to upload.                                                                                                   |
|                                        |                                                                                                                                                                        |
| <b>GUI</b>                             |                                                                                                                                                                        |
| <b>GUI/ Settings/ Network Settings</b> | WAN IP address configuration on GUI.                                                                                                                                   |
| <b>GUI/ Menu</b>                       | Camera control on GUI <ul style="list-style-type: none"> <li>- Zoom in/out</li> <li>- Home, 8 directions continuous move</li> <li>- Preset calling: P0 ~ P7</li> </ul> |
|                                        |                                                                                                                                                                        |
| <b>Other</b>                           |                                                                                                                                                                        |
| <b>Multi-language</b>                  | Added Estonian language pack.                                                                                                                                          |
| <b>Other</b>                           | Change: mute audio sources while pausing.                                                                                                                              |
| <b>Other</b>                           | Improve the audio input level indicator to be more sensitive.                                                                                                          |
| <b>Other</b>                           | Recording indicator on UB-01B<br>Record LED on UB-01B:                                                                                                                 |

---

|  |                                                                                                                              |
|--|------------------------------------------------------------------------------------------------------------------------------|
|  | <ul style="list-style-type: none"><li>- Slow flashing: record end processing</li><li>- Fast flashing: record pause</li></ul> |
|  |                                                                                                                              |

## Issue Fixed & Modification

### V2.9.6.12

- Fix "Panopto Remote Recorder ID issue exists in v2.9.x.6 ~ v2.9.x.11"
  - Fix "[v2.9.x.6 ~ v2.9.x.11] adjusting volume level and switching layout in director via IE11 over-consume CPU"
  - Fix "Click the 'Default button in Web Admin -> Media I/O -> Display -> Screen color adjustment will make image brighter"
  - Modify "Media Station ignore the button pressed event of UB-01B in next 1 second after it is pressed to avoid accidental button-press event"
  - Fix "If the network is disconnected during Kaltura scheduler recording, the recording would not stop until the network is re-connected"
  - Fix random issue: "When Media Station is connecting to scheduler server: Opencast/Panopto/Kaltura, it is listed as 'cbox' on the server's capture agent list"
  - Fix "In the Theme Editor, it is unable to apply setting if there were two windows were once set to the same channel"
  - Fix "In the Theme Editor, after editing a theme with overlay and background, edit a theme without them, this theme preview will apply the previous theme's overlay and background"
  - Fix "In the Theme Editor, after selecting the same channel in 2 windows and moving around any window, apply button would be available while it shouldn't"
- 
- **Notice: During the firmware update progress, please always keep the power on to prevent permanent system unstable or damage.**
